<p>Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?</p> <p>After the uncovering of wall C907 and the defining of its limits we tried to investigate its relationship with C903 (possible oven) and we discovered that the area between C907 and C903 is empty and they are not connected. So we defined this area as C910 which includes the area outline of the wall on the eastern side. It has a soft and relatively easy to remove soil, with pottery mostly from LNII</p>
