| <p>◇ Samples: (list, noting: Sample #, Type, Volume)</p> <p>None taken</p> | | |
| Deposit Sieved: YES/NO | % Sieved: 100 | |
| <p>Discussion: Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?</p> <p>This context is top soil. All finds are out of context due to farming in the area (regular tilling of the field). The top soil is expected to continue for 40-60cm. No special finds - bulk finds of pottery, CBM + potentially lithics. Sieving done by hand trowelling.</p> | | |
