<p><b>Discussion:</b> Consider: What is it? What is your interpretation rationale? How does this context relate to surrounding contexts? Have there been post-depositional processes? Are there special characteristics of this context? How was this context formed? What do you think is the origin of this context?</p> <p>Lots of round stones, which is easy to hand, the soil is same as C60.  It's supposed <sup>could</sup> to be a stone tools factory, cause there were some chipped stones, flints, scraps, round stone and stone raw materials, which are associated with indirectly making process. the round stone may be used as hammer, and after using these stones, they just throw at the same area.</p>
